Acne Treatment System

THREE STEP SYSTEM TO TREAT MILD-TO-MODERATE ACNE IN 70% LESS TIME

Most acne treatments take around six to eight weeks before visible results are seen. However, our unique and innovating approach to treating acne allows treating acne FAST usually within two weeks. Our unique formula works on tackling and reversing most of the acne causes, such as, excess oil, dead cells, plug pores, bacterial growth and inflammation. All these causes are responsible for the creation of blackheads, pus and pimples.

Our special formula combines FDA approved OTC ingredients, such as Salicylic Acid, to address acne problems and other technologically advanced ingredients to reverse these causes. The main goal of our FAST and highly effective **DH SYSTEM** is to unplug pores, kill bacteria and eliminate inflammation. At the same time, special care is given to clean and hydrate the skin and to prevent new breakouts. In fact, after the treatment the skin becomes cleaner, softer, less oily and free of imperfections.

Our DH SYSTEM includes 1. Wash, 2. Treatment, 3. Control.

Our unique active ingredients are very versatile able to act simultaneously against all the causes of acne. Our formula is FREE from Benzoyl Peroxide, the most common ingredient found in other brands, because it triggers skin irritation.

Some of the main ACTIVE ingredients have shown unique properties in fighting acne:

SEPICONTROL AS

A Dermo protecting and purifying active agent that restores the balance to acne-prone oily skin by reducing the number of blackheads and the sebum level. **SEPICONTROL™ AS** is a sebo-regulator that targets and combats the major causes of skin imbalance and acne. Combats bacterial proliferation, inflammation (anti-elastase, anti-Interleukin 1α, anti-radical action), hyperkeratinization, limits production of peroxidizable free fatty acids (anti-lipase).

TRIKENOL PLUS

is a complex of natural origin active ingredients designed to treat acne-prone oily skin. Its blend of Terpinen-4-ol and Willow Extract, enriched with salicylic derivatives, provides an effective anti-acne, anti-irritant, anti-seborrheic and keratolytic action. Prevents and reverses signs of neurogenic inflammation (redness and swelling).

NEUTRAZEN

is an innovative biomimetic tri-peptide derived from neuromediator (POMC) linked to a lipid for optimal penetration and efficacy. Prevents & reverses signs of neurogenic inflammation, calms & soothes irritated skin and helps to maintain & restore a normal skin sensitivity threshold

SEBULESS is a purifying seboreregulator. It reduces excessive sebum production. Controls microbial proliferation, inflammation, hyperkeratinisation and hyperpigmentation. It is ideal for oily or acne-prone skin as an anti-acne blemisher

Niacinamide PC

Works to help rebalance pigmentation refine pores and improves skin elasticity and resilience. **NIACINAMIDE PC** can enhance the efficacy of products designed for blemished, dry & sensitive and mature skin, while recent evidence of its potential help in protecting UV-stressed skin

Salicylic Acid

Also called beta hydroxy acid (BHA), this multifunctional ingredient addresses many of the systemic causes of acne. Salicylic acid's primary benefit is as an exfoliant helping to shed the unhealthy build-up of dead skin due to sun damage, aging, and the abnormal build-up of oil and dead surface cells for those with acne, congested pores, and oily skin. Salicylic acid helps skin exfoliate in a natural, gentle manner similar to how skin was able to exfoliate when we were younger. In addition to these benefits, salicylic acid also has soothing properties to calm aggravated skin, can help minimize the appearance of an uneven skin tone, and has hydrating abilities that can result in smoother skin.

DH Acne Cream is manufactured in EU (European Union) under strict regulations in accordance with European Directives. The manufacturing plant operates in accordance to ISO 22716 / GMP (Good Manufacturing Practice). Further more, in 2008 the International Organization BID (Business Initiative Direction) based on the facts by IAE (International Arch of Europe Award for Quality TQM 100), granted the company the Gold Award Arch of Europe which is the International award for Quality. Needless to say that the company has also obtained ISO 9001:2000 Certification for Quality Management.

Antiseptic SOAP OR SPRAY

An antibacterial, antifungal, antiparasite and antiviral Fast Acting Skin Disinfectant. Antiseptic Spray is colorless, odorless and does not cause any rash or adverse reaction. Antiseptic Solution acts against various microorganisms such as:

- Bacteria
- Parasites
- Fungi
- Viruses
- Simple Herpes

The solution is suitable for dermal application for the treatment of minor skin infections and overall wound management. Just spray on the affected area. Antiseptic's active ingredients are not absorbed by the skin or by the mucus membranes so it is ideal for superficial skin infections. Always use only as directed by a healthcare professional. Antiseptic comes also as an Antibacterial Cleansing Soap suitable for body shower and hair cleansing. It is PH balanced to match skin's PH.

Both can be used by all ages making the products ideal for the entire family.

DH Antiseptic is manufactured in EU (European Union) under strict regulations in accordance with European Directives. The manufacturing plant operates in accordance to ISO 22716 / GMP (Good Manufacturing Practice). Further more, in 2008 the International Organization BID (Business Initiative Direction) based on the facts by IAE (International Arch of Europe Award for Quality TQM 100), granted the company the Gold Award Arch of Europe which is the International award for Quality. Needless to say that the company has also obtained ISO 9001:2000 Certification for Quality Management.

DH Antiseptic Spray comes in a 60ml bottle and Antiseptic Antibacterial cleansing Soap comes in 250ml bottle. Both are available over-the-counter as an OTC product for external use only. You should always consult your doctor or pharmacist before using any product if you have any special medical conditions.

DH

ANTISEPTIC SPRAY

Dermal Application

Helps Promote a Fast Healing Process of Compromised Skin. Dermal Application is a water-based emulsion for derma application for the relief, healing and management of various topical skin conditions associated with:

- **1st and 2nd degree burns**
- **Sunburns**
- **Dermal Ulcers**
- **IPL or Radiation Dermatitis**
- **Post Cosmetic Surgery and Laser Peels**
- **Irritation**
- **Rashes including Diaper Rash**

- **Minor Cuts**
- **Abrasions**
- **Erythema**
- **Other cutaneous wounds**

It may also be used for other skin conditions as determined by your doctor. Dermal application special formula is easily absorbed for fast and effective results. It stimulates and promotes fast healing and thus suitable as a wound dressing and management of superficial skin wounds. It can be used for people of all ages without any adverse reactions. Always use only as directed by a healthcare professional.

DH Dermal application is manufactured in EU (European Union) under strict regulations in accordance with European Directives. The manufacturing plant operates in accordance to ISO 22716 / GMP (Good Manufacturing Practice). Further more, in 2008 the International Organization BID (Business Initiative Direction) based on the facts by IAE (International Arch of Europe Award for Quality TQM 100), granted the company the Gold Award Arch of Europe which is the International award for Quality. Needless to say that the company has also obtained ISO 9001:2000 Certification for Quality Management.

DH Dermal application comes in a 100ml tube. It is available over-the-counter as an OTC product for external use only. You should always consult your doctor or pharmacist before using any product if you have any special medical conditions.

INGREDIENTS

AQUA, AMMONIUM ACRYLOYLDIMETHYLTAURATE/VP COPOLYMER, GLYCERIN, DISODIUM ADENOSINE TRIPHOSPHATE, CARICA PAPAYA FRUIT EXTRACT, ALGIN, SODIUM HYDROXIDE, AVOCADO OIL, ETHYL XIMENYNATE, TRIETHANOLAMINE, PHENOXYETHANOL, CHLORHEXIDINE DIGLUCONATE, PROPYLENE GLYCOL, ETHYLHEXYGLYCERIN, OCTENIDINE HCL, HYDROLYZED GLYCOSAMINOGLYCANS, HYALURONIC ACID, COLLAGEN, SODIUM CARBOXYMETHYL BETA-GLUCAN

DIRECTIONS FOR USE:

1st degree burns, Sunburns: Apply in thick layers until the skin no longer absorbs, massaging gently the last application, reapply as long as the skin feels hot.

2nd degree burns, other cutaneous wounds: Cover the wound and neighbouring areas with a thick layer and repeat the operation so as to always maintain an excess of emulsion on the wound. If a dressing is necessary: Apply a thick layer of Dermal application (approximately 1/2 cm thick).

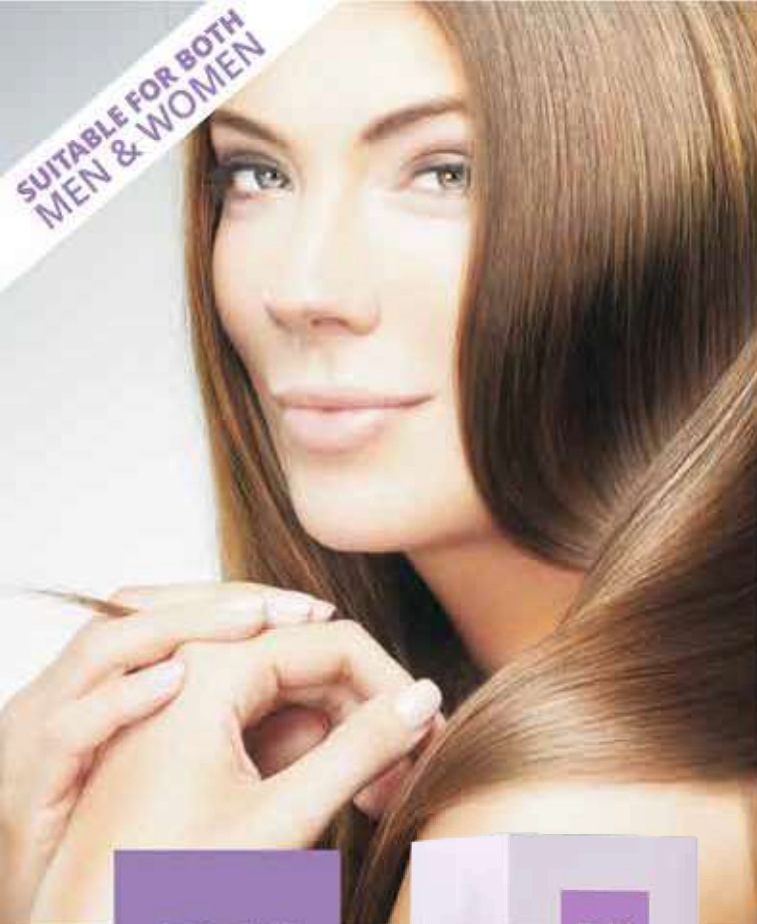

Radiotherapy treatments: 2 to 3 applications a day, at regular intervals, allowing the DH Dermal application to penetrate by gently massaging.

SUITABLE FOR BOTH
MEN & WOMEN

Hair + Scalp TREATMENT

For a Fast and Effective relief of Scalp problems DK Hair + Scalp Treatment Spray is a unique blend of 100% natural botanical extracts specifically formulated for the relief of scalp problems. All Herbal ingredients are grown in the Mount Athos in Greece and have shown properties and abilities that alleviate common discomfort associated with the Scalp such as:

1. Dandruff
2. Eczema
3. Itchy Scalp
4. Flaky Scalp
5. Dryness and Irritation
6. Other conditions associated with scalp dermatitis

Rosemary

It has demonstrated antibacterial, anti-blemish, anti-dandruff, antifungal, anti-inflammatory, anti-microbial, and antioxidant properties, in addition to be astringent and having free radical scavenger properties.

Common Nettle Extract

It mainly demonstrated anti-irritant activity, hair integrity against oxidative processes, anti-dandruff properties, and serves as a tonic for hair and scalp

Lappa

Mainly reduces scaly skin

Menthol

Serves as topical analgesic for cooling sensation.

Symphytum officinale

It has clearly shown to boost the regenerative power of epidermal stem cells and their ability to build new tissue.

DK Hair + Scalp Treatment is manufactured in EU (European Union) under strict regulations in accordance with European Directives.

The manufacturing plant operates in accordance with ISO 22716 / GMP (Good Manufacturing Practice). Further more, in 2008 the International Organization BID(Business Initiative Directions) based on the facts by IAE (International Arch of Europe Award for Quality TQM 100), granted the company the Gold Award Arch of Europe which is the International award for Quality. Needless to say that the company has also obtained ISO 9001:2000 Certification for Quality Management.

Directions for Use: Spray directly on dry hair and scalp. Massage Gently. For the first 4 days spray twice daily, then for the next three days spray just once a day and after the first week spray once every 3-4 days. No need to wash after spraying. Just spray directly on hair and that's it. Normally, within a few days, most of the problems go away depending on one's individual condition.

Warning: Avoid contact with eyes. For external use only. Keep out of children's reach and sight. Do not pierce or burn after use. Not recommend for children under three years of age.

FUNGIKI

DESCRIPTION:

FUKGIKI Contains specially processed nutrients ideal healthy nails

Active Ingredient	Gynura olive oil Tea tree oil Levanter oil Vitamin E Undecylenic acid
Dosage Form	Drops
Indication	Ideal for healthy nails
Flavor	-
Package	10ml

FUNGIKI BENEFITS:

- Ideal for healthier nails
- Hydration
- It penetrates under the hard surface of the nails.
- Fights fungi and other harmful microorganisms
- Regenerates nails
- Eliminates the bad smell of nails

Ingredients benefits:

Gynura olive oil:

Extra virgin olive oil as opposed to refined olive oil to reap the most benefits, as extra virgin olive oil is rich in antioxidants and fatty acids that help hydrate and protect the skin

Tea tree oil:

Its natural anti-inflammatory properties can soothe irritated skin around the nails, preventing hangnails and promoting healthier cuticles. Plus, the moisturizing properties of Tea Tree Oil can combat dryness, preventing brittle nails that are prone to breaking and chipping.

Levanter oil:

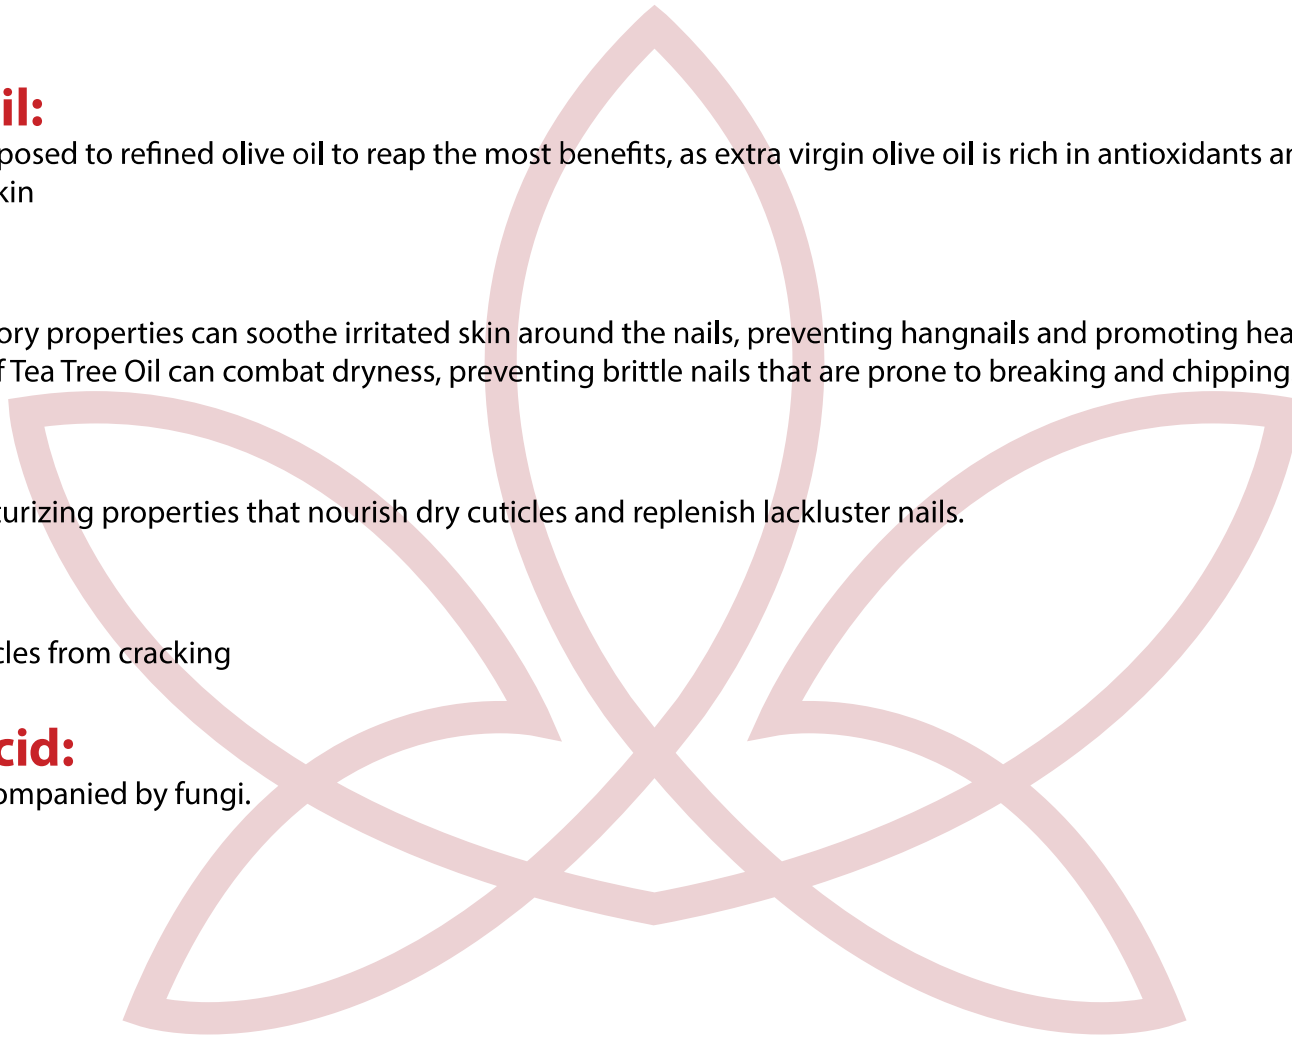

Lavender possesses moisturizing properties that nourish dry cuticles and replenish lackluster nails.

Vitamin E:

Vitamin E oil prevent cuticles from cracking

Undecylenic acid:

Relieves irritated skin accompanied by fungi.

DH

Antiseptic Line

DH HYGIENIC SOLUTION

DESCRIPTION:

Innovative product, acts immediately, absorbs very quickly, and does not stain. A product for both personal and general hygiene purposes.

Active Ingredient	Alantoin Glycerin Alcohol 81% Hydrogen Peroxide
Dosage Form	Spray
Indication	Hygiene solution. Antiseptic
Flavor	----
Package	80ml, 500ml, 1L and 4L

DH HYGIENIC SOLUTION BENEFITS:

- Alcohols used in common antiseptics do not offer protection from spores that survive in alcohols. This problem is solved by using DH HYGIENIC SOLUTION with the inclusion of Hydrogen Peroxide.
- It works by 99,999% with a cataclysmic mechanism against all microbes, breaking down their cell membrane and effectively destroying them.

Ingredients benefits:

Alantoin:

Allantoin can help to kill bacteria
Protects the skin despite the high concentration of active ingredients with alcohol.

Glycerin:

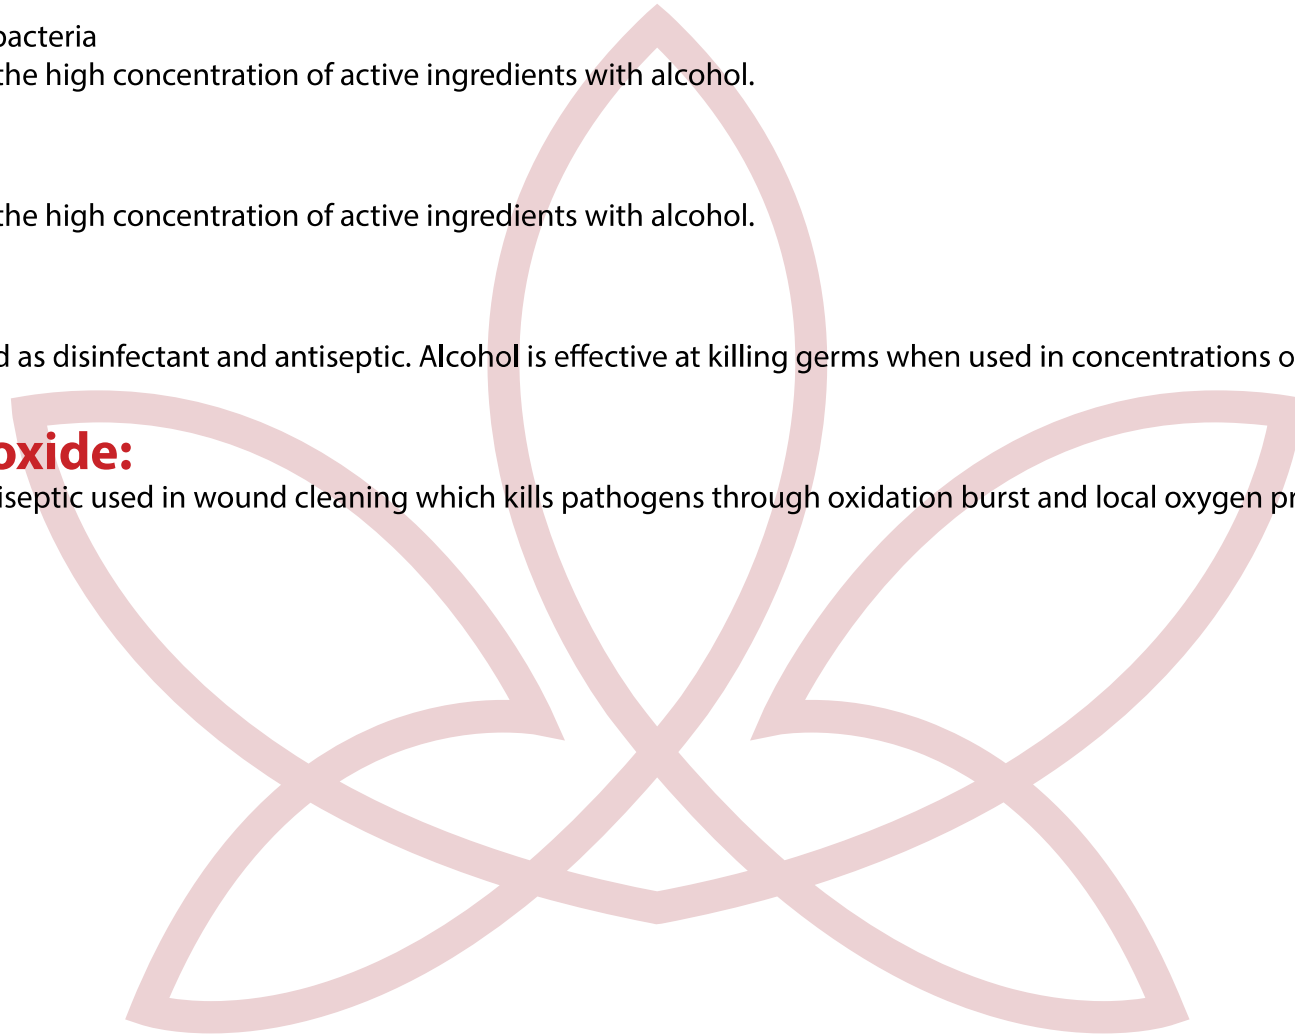

Protects the skin despite the high concentration of active ingredients with alcohol.

Alcohol 81%:

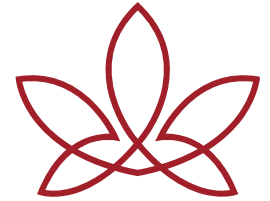

Alcohol is commonly used as disinfectant and antiseptic. Alcohol is effective at killing germs when used in concentrations over 60 percent

Hydrogen Peroxide:

Hydrogen peroxide is antiseptic used in wound cleaning which kills pathogens through oxidation burst and local oxygen production.

ASEPTIC SPRAY

DESCRIPTION:

ASEPTIC SPRAY has antibacterial, antifungal and antiviral properties

Active Ingredient	Propylene glycol Ethylhexyglycerin Octedine HCL Chlorhexidine di- gluconate Phenoxyethanol
Dosage Form	Spray
Indication	Antibacterial antifungal and antiviral properties
Flavor	----
Package	80ml

ASEPTIC SPRAY BENEFITS:

- Antibacterial
- Antifungal
- Antiviral

Ingredients benefits:

Propylene glycol:

Ethylene and Propylene Glycol inhibit the growth and proliferation of most microbes and fungi. The reduced surface tension in the glycol solution interrupts the cell walls of the bacteria, resulting in an environment that will not support bacterial growth.

Ethylhexylglycerin:

Ethylhexylglycerin is a multifunctional cosmetic ingredient used as an active component, as an emollient and humectant in skin care, and boosting the anti-microbial performance of other ingredients to protect products from spoilage.

Octedine HCL:

Octenidine has a broad spectrum antimicrobial activity against Gram-positive and Gram-negative bacteria, fungi and a moderate virucidal activity against enveloped viruses

Chlorhexidine digluconate:

Chlorhexidine gluconate (CHG) is a preferred skin antiseptic over tinctures of iodine, iophors and alcohol. It is a substituted diguanidine salt with a high degree of antimicrobial activity

Phenoxyethanol:

Phenoxyethanol is a colorless liquid with a pleasant odor. It is a glycol ether used as a perfume fixative, insect repellent, antiseptic, solvent, preservative, and also as an anesthetic in fish aquaculture.
